The **struggle for the 30-hour week with full wage compensation** is the answer to the current challenges in the factories: the beginning new structural crisis in connection with the conversion to electro-mobility (which we welcome), against job destruction through mergers, against flexibilization

and sub-contracted labor, for international workers unity and the future of the youth. Each badge symbolizes one of these key issues. The 30-hour week with full wage compensation on five days from Monday to Friday can create and maintain millions of jobs at the cost of profits. It is absurd that in this society some are working longer and longer (raising of retirement age, overtime and extra shifts), while others are not finding work or are underemployed in part-time jobs. With the symbol of the sun we take up the trade-union strikes in Germany of the 1980's for the 35-hour week. We stand up worldwide for trade unions as fighting organizations.

Onward to the working-class offensive!
